THE PROBLEM

APP PAGE: Start page

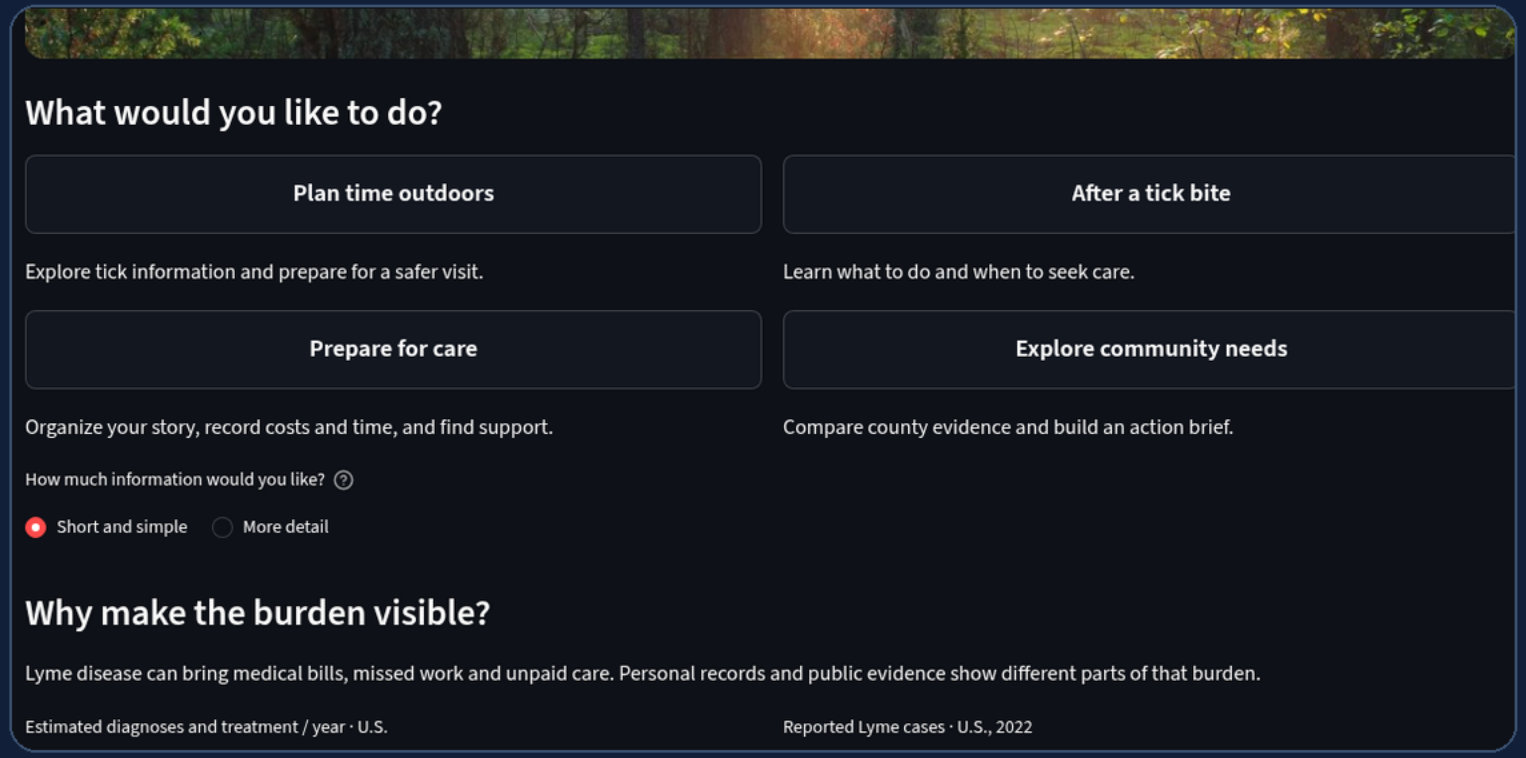

One pathway. Practical next steps.

PREVENT
Prepare for time outdoors

RESPOND
Know what to do after a bite

PREPARE
Bring a clearer record to care

PLAN
Explore support priorities

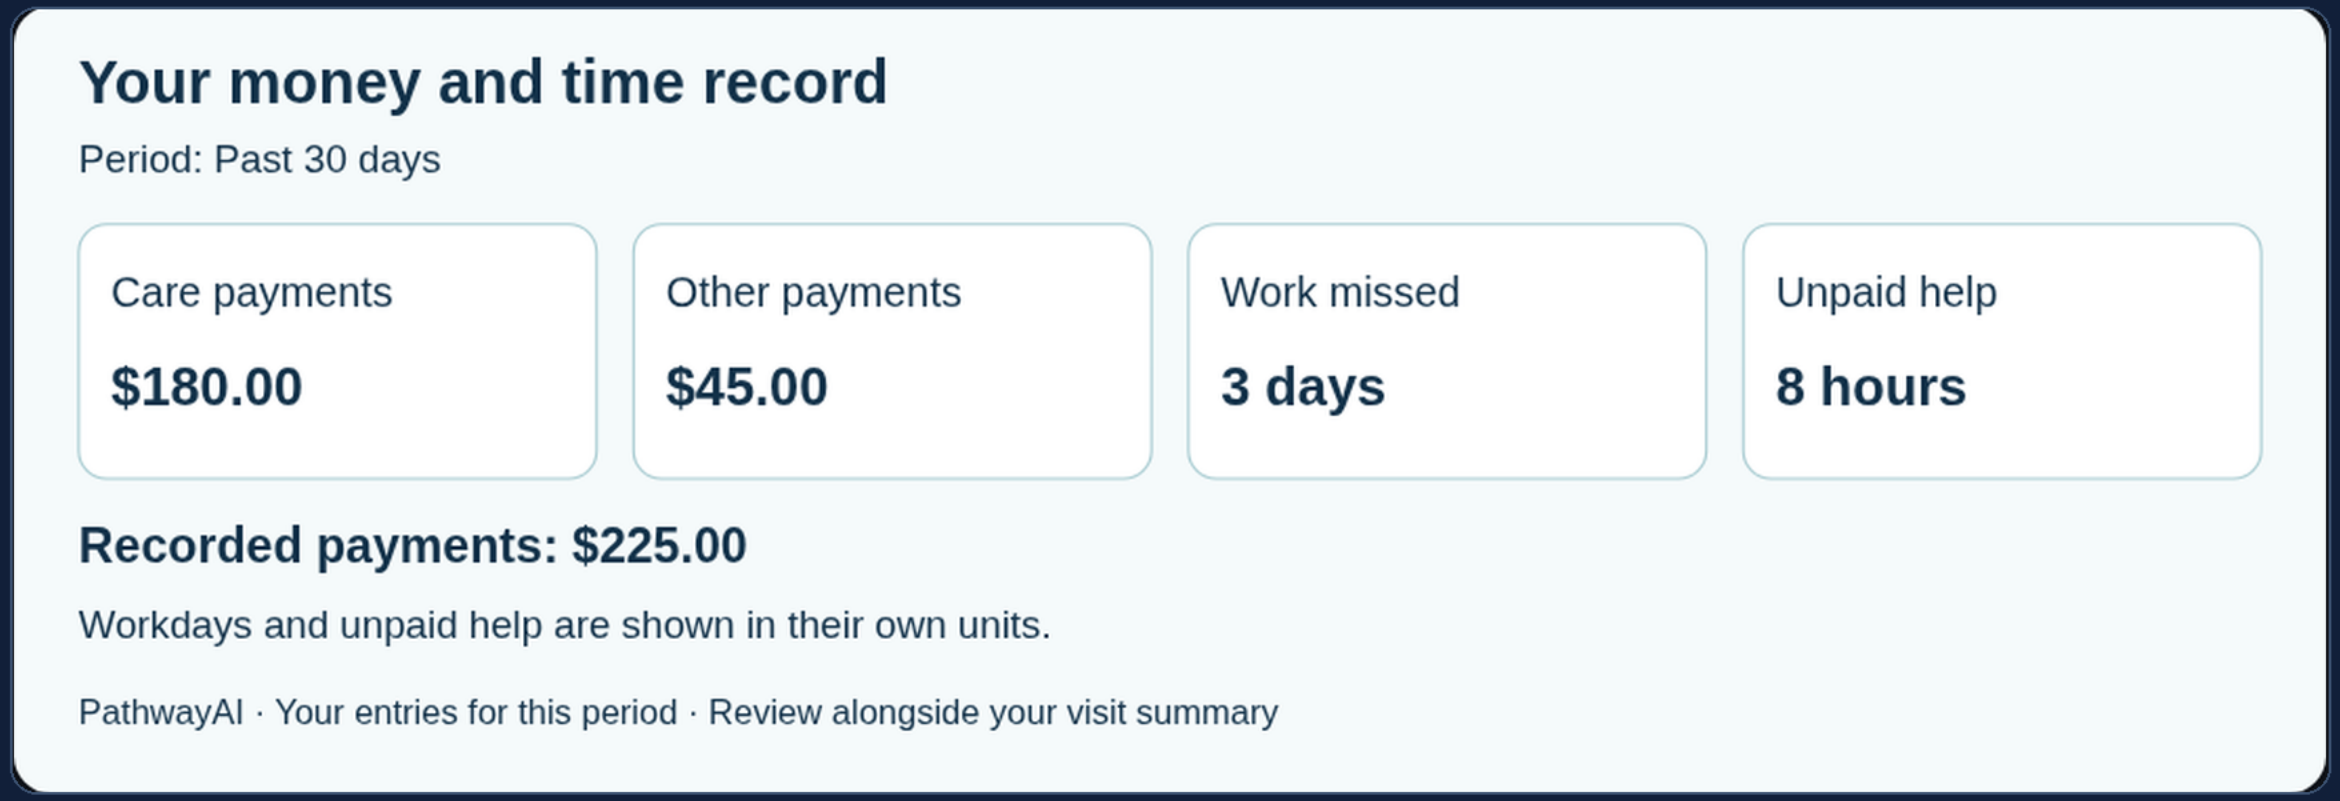

Actual local app view. Four public pathways; no patient contribution required to use preparation tools.

UNDERSTANDING
THE HIDDEN BURDEN

APP PAGE: Care & Support → Costs, time and support

The burden is more than a medical bill.

Fictional entries. Payments, missed workdays and caregiver hours stay separate; support requests do not arrange services.

APP PAGE: Community Burden & Action → County comparison

Public evidence gives community context.

DUTCHESS

$2.15M

1,060 reported cases · 2024

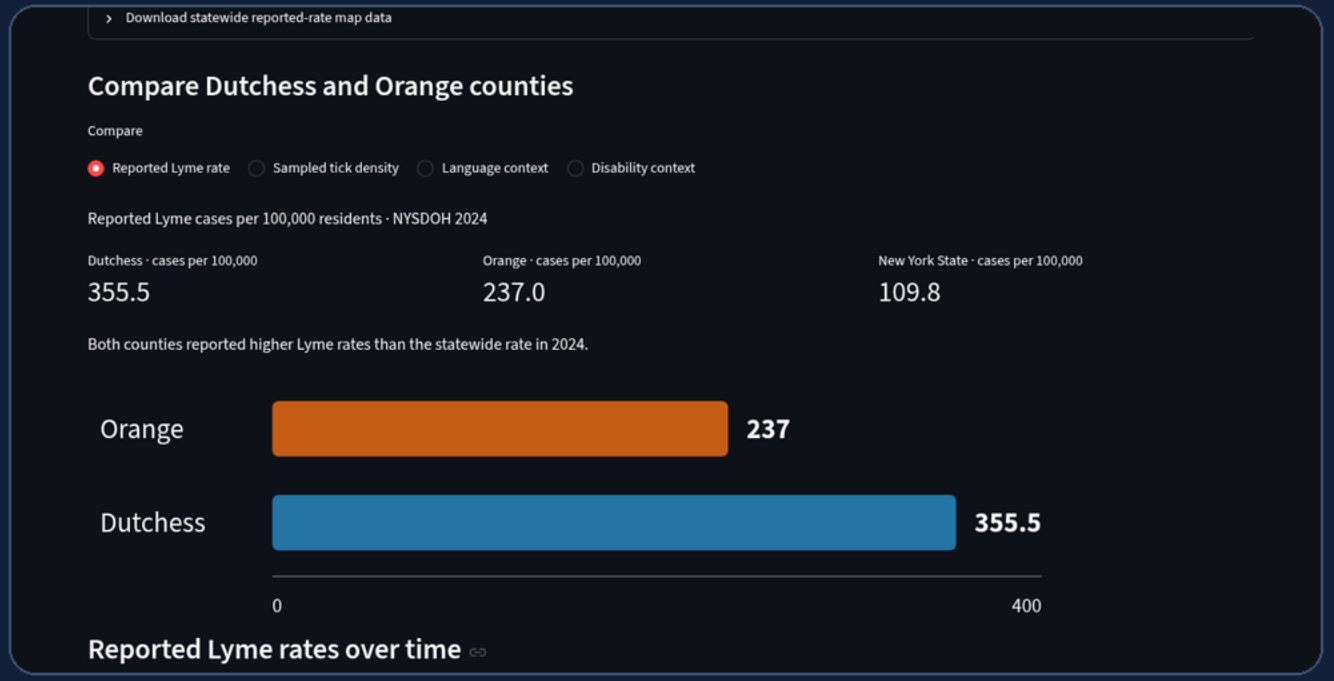

Illustrative societal amount

ORANGE

$1.96M

964 reported cases · 2024

Illustrative societal amount

Federal: CDC · Census · HRSA AHRF · CDC PLACES

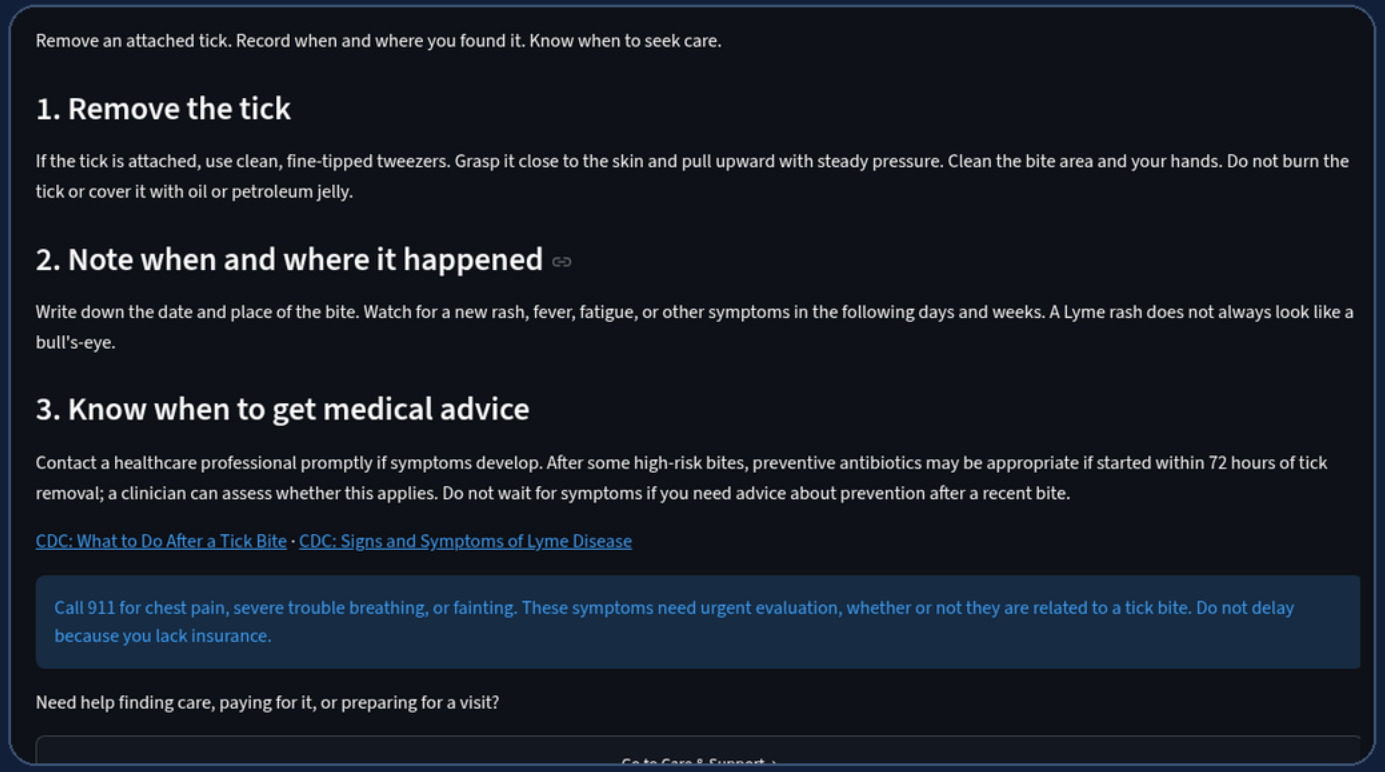

Illustration: 2024 reported cases × Hook study mean; 2016 dollars.
Not measured county spending, individual risk or demonstrated savings.

FROM INFORMATION TO ACTION

APP PAGE: Learn & Prevent → Tick Bite: What Next?

Prepare before a bite. Act promptly after.

1. Prepare for time outdoors
2. Remove and record the tick encounter
3. Seek timely clinical advice

Remove an attached tick. Record when and where you found it. Know when to seek care.

1. Remove the tick

If the tick is attached, use clean, fine-tipped tweezers. Grasp it close to the skin and pull upward with steady pressure. Clean the bite area and your hands. Do not burn the tick or cover it with oil or petroleum jelly.

2. Note when and where it happened

Write down the date and place of the bite. Watch for a new rash, fever, fatigue, or other symptoms in the following days and weeks. A Lyme rash does not always look like a bull's-eye.

3. Know when to get medical advice

Contact a healthcare professional promptly if symptoms develop. After some high-risk bites, preventive antibiotics may be appropriate if started within 72 hours of tick removal; a clinician can assess whether this applies. Do not wait for symptoms if you need advice about prevention after a recent bite.

CDC: What to Do After a Tick Bite · CDC: Signs and Symptoms of Lyme Disease

Call 911 for chest pain, severe trouble breathing, or fainting. These symptoms need urgent evaluation, whether or not they are related to a tick bite. Do not delay because you lack insurance.

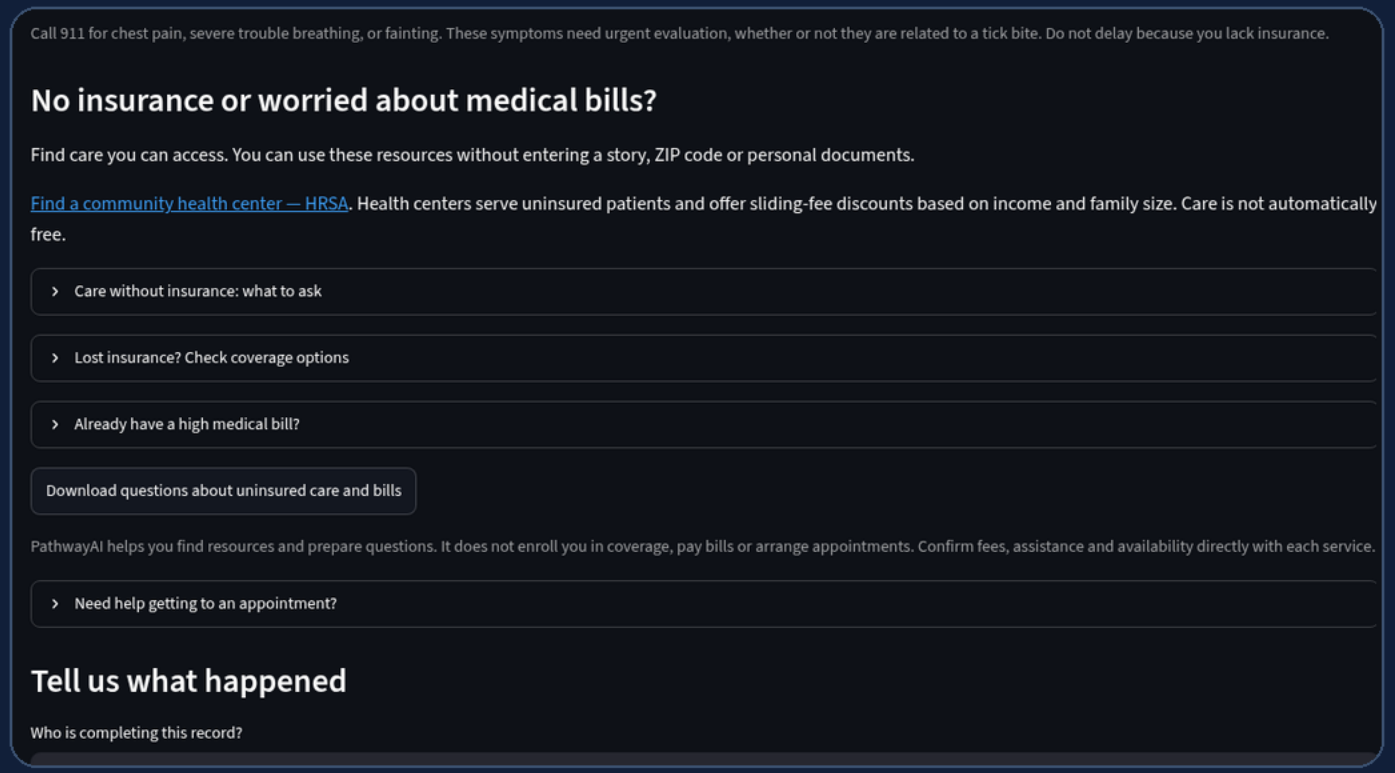

Need help finding care, paying for it, or preparing for a visit?

CDC-based guidance. A clinician assesses prevention after selected high-risk bites; antibiotics are not needed after every bite.

APP PAGE: Care & Support → Care access

Find a starting point without insurance.

- Find a community health center
- Ask about income-based fees
- Prepare coverage and bill-assistance questions

Fees, eligibility and appointments must be confirmed directly. Care is not automatically free.

APP PAGE: Care & Support → Your organized visit summary

Keep the timeline—and the test result.

TICK ENCOUNTER

Found in July

SYMPTOM ONSET

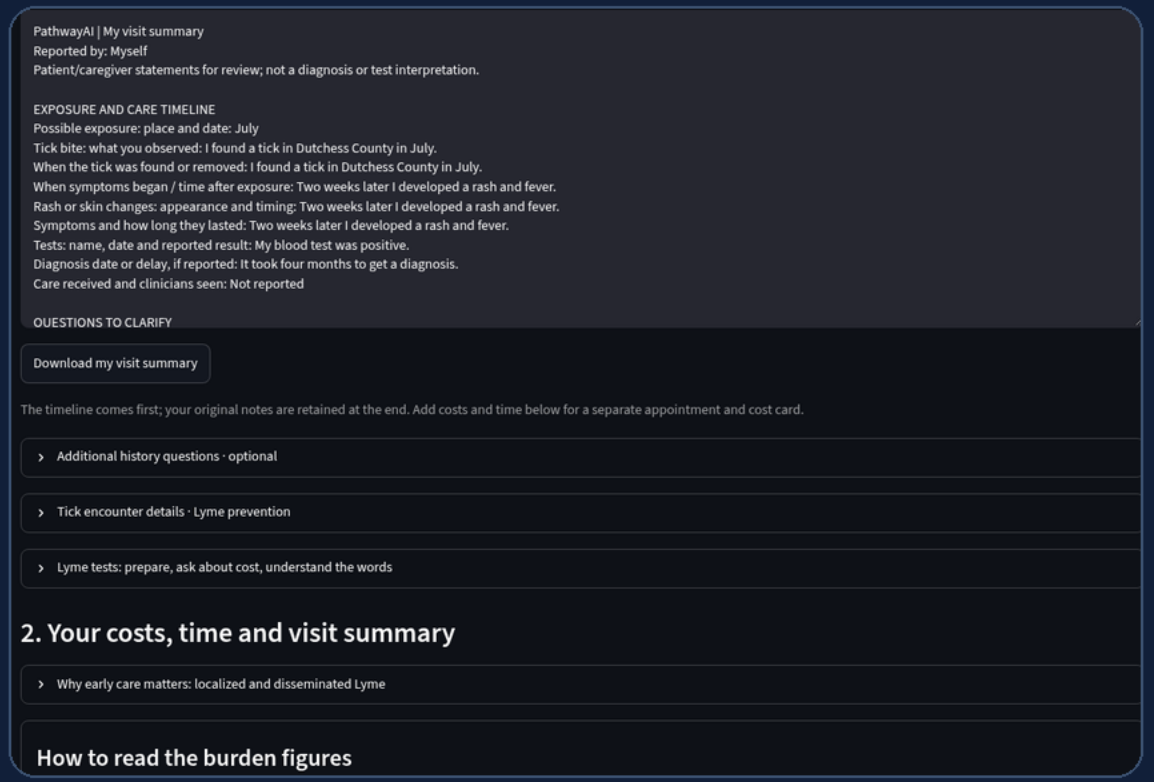

Rash and fever two weeks later

TEST RESULT

Positive blood test—patient reported

DIAGNOSIS TIMING

Four months—reported separately

Fictional patient example. Patient-reported results are not a diagnosis; bring the original laboratory report.

APP PAGE: Tick Bite: What Next? / Care & Support → Preferred language

Your words. A reviewed English summary.

Write in your preferred language / 语言 / Idioma

中文 / Chinese

Choose a language → give permission → review both versions

ORIGINAL NOTES / 原文

七月发现蜱虫。
两周后出现发烧和皮疹。
血检结果为阳性。

ENGLISH — FOR REVIEW

I found a tick in July.
Two weeks later I developed fever and a rash.
My blood test was positive.

Illustrative bilingual example—not a live AI response. AI can mistranslate; it does not replace a qualified medical interpreter.

APP PAGE: Community Burden & Action → Patient voices → community action

Turn a barrier into a feasible next step.

REVIEW

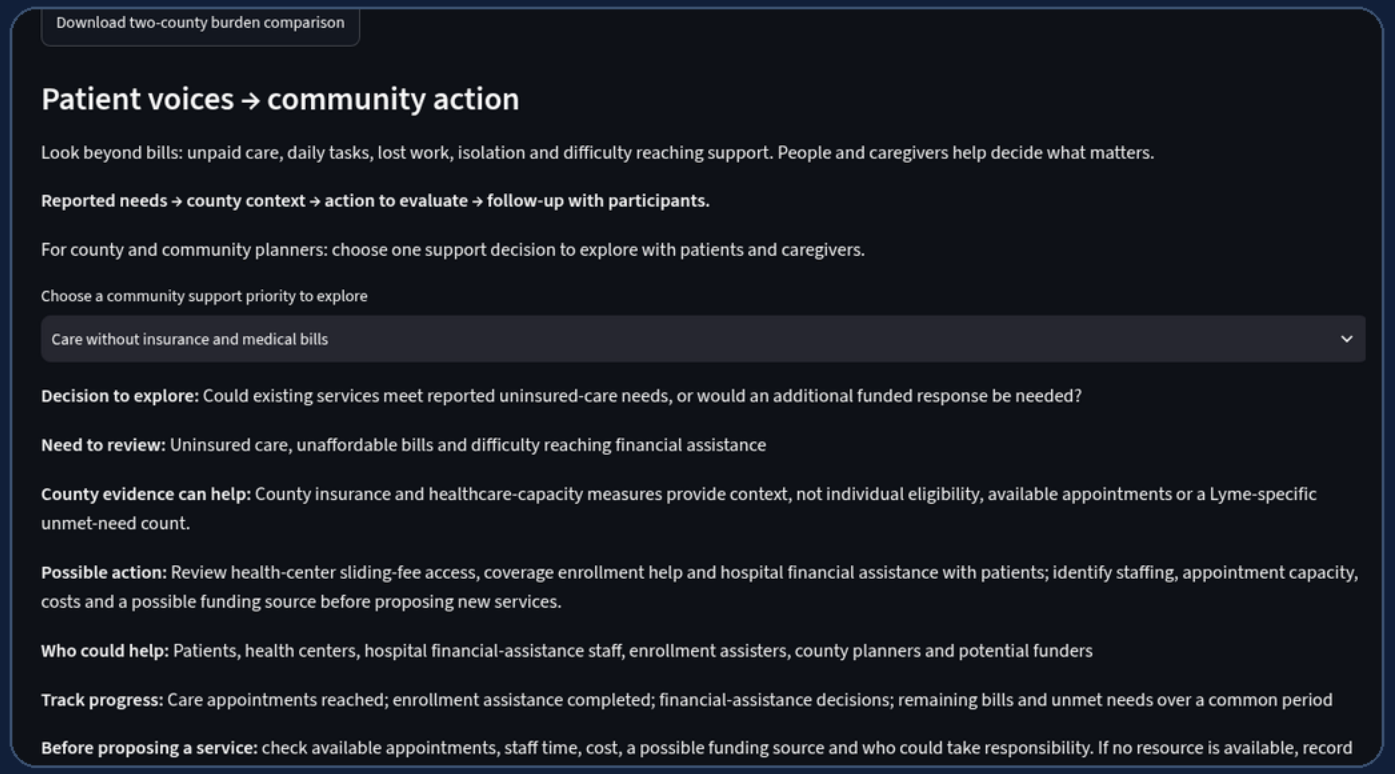

Existing services and eligibility

AGREE

Capacity, funding and responsibility

FOLLOW UP

Appointments reached, support received, unmet needs

A planning template, not a funded county program. Real shared patient-report collection is currently off.

APP PAGE: Across the app → Users, feedback and testing

Feedback changed what people can do.

WORKING-APP REVIEW

People living with Lyme disease and a county health commissioner

Feedback: clearer purpose, simpler language and practical next steps.

FEEDBACK → CHANGES

Hard-to-find reports
→ Immediate timeline
Language barriers
→ Optional bilingual notes
“What can I do next?”
→ Practical support questions
